

## SHENANDOAH FARMS COMMUNITY GARDEN INTEREST SURVEY

### Would You Be Interested in a Garden Plot for Spring 2027?

The Property Owners of Shenandoah Farms (POSF) is exploring the possibility of creating a **Community Garden** at the **Treasure Island Common Property Park Area** beginning in the Spring of 2027.

The proposed garden would provide residents with an opportunity to grow vegetables, herbs, flowers, and other garden plants in a shared community setting while enjoying the benefits of gardening and getting to know fellow residents.

### Proposed Garden Layout

The current concept includes:

- Individual **10' x 10' garden plots** available to residents
- A garden location within the Treasure Island Common Property Park Area
- Common pathways throughout the garden area
- Basic garden guidelines to help ensure a pleasant experience for everyone

The number of plots ultimately developed will depend on community interest and site planning.

### Why a Community Garden?

A community garden can provide:

- Fresh, homegrown vegetables, herbs, and flowers
- A healthy outdoor activity for individuals and families
- Opportunities to meet neighbors and build community connections
- Educational experiences for children and new gardeners
- An attractive and productive community asset

### We Need Your Input

At this stage, POSF is simply trying to determine the level of interest among residents.

### Would you be interested in reserving a 10' x 10' garden plot for the 2027 growing season?

- Yes, I would likely reserve a plot.
- Maybe, I would like additional information.
- No, but I support the idea.

**POSF Community Garden Planning Committee**

*“Growing food, flowers, friendships, and community.”*

*A preliminary garden area of approximately 50' x 100' is being considered, which could accommodate multiple 10' x 10' plots along with shared access paths and common space.*
